in all acute care settings; ER, OR, PACU, ICU and NICU.

**36.5°C**  
OBCAB, Transplant,  
Major Surgery,  
Rewarming

**33°C**  
Coma, TBI,  
Stroke, Fever

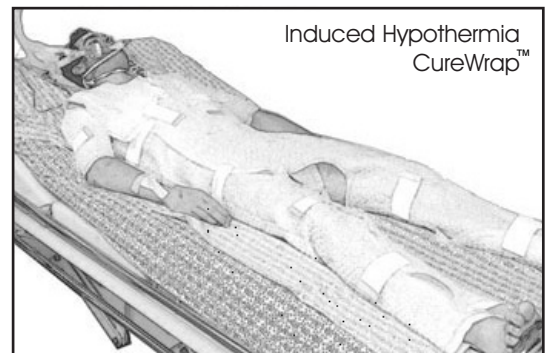

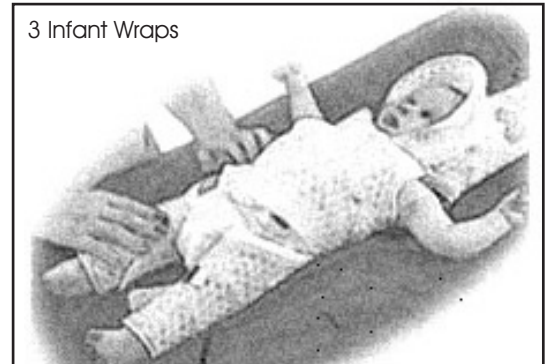

# ThermoWrap™ CureWrap™

## Product Information

ThermoWrap and CureWrap are the safest and most accurate thermoregulation garments available. Intended for the OR, ER, ICU and NICU they can be used for any patient and indication between 30°C and 40°C. The garments are available in sizes for all patients, infant to adult. The patented body-wraps simulate immersion therapy, without the bath, thus providing the most effective temperature management without the mess. Sophisticated software on the companion control units predict and control patient core temperature with clinically proven accuracy. When temperature matters, ThermoWrap and CureWrap are the solution!

### Key Features
